How to work out the time of a city or state to call a customer?

What time is it in a particular city or state or country?

How do I find out the time in a city or state or country?

We have been working very closely with **TimeAndDate.com** for them to make a page that would be ideal for us. Together they have created the Time Zone Map as an added feature on their incredible website.

Â

With this in mind, it is now very very easy to work out the exact time of a city or country you are calling by simply hovering over the red dot in that country or typing in the desired city.

Â

This I hope will make life easy for everyone so that you know what the times are in the different cities and states and I am certain that with this more and more of you will be able to make more calls and at the right times with ease.

To find the time of a particular city, state or country as a GuideÂ use the Time Zone Map.

Click on this link to use the **Time Zone Map**. <http://www.timeanddate.com/time/map/>

When using the map, enter the city you want in the

Search city:

and then click

Show on map

This will show

and place a black "pin"  by that city on the map.

. You can add multiple pins to see their times. Just hover and/or click on the pin for the exact time of that city/ place.

Hover your mouse over any of the red dots to see the name of the city and country and current local time.
