

# Customer

## What is a New History?

A New History is exactly as it sounds. It means you are making a new historical note based on either a call, a to-do or an email.

New History should be used for a customer when 1 of the following occurs:

1. When the customer calls you and does not have a scheduled activity for you to clear.
2. A New Customer calls and you need to make a History.
3. You make an error on the Clear Activity and need to create a history
4. If you get a call transfer from the office staff about a customer and there is no scheduled activity that you have permission to clear.
