# Product Availability Page

## I keep getting "Option Tab Fields and/or Configurable Fields are NOT COMPLETED. Click on the Tabs and complete the fields." when using the product availability page or when trying to add a new order.

If you get the following error message.

"**Option Tab Fields and/or Configurable Fields are NOT COMPLETED**. **Click on the Tabs and complete the fields.**"

When using the product availability page or when trying to add a new order, it means you have not completed all required fields.

In the section window click on the tab **Options**

and check that all required fields are completed.

Then if there is a Configurable Fields tab as well click on this tab

and check that all required fields in this tab have been correctly answered as well.
