Product Availability Page

A customer would like to have two shows on the same day, but the product availability page shows only 1?

If a customer wants two or more shows on the same day and the product availability page only shows 1 available, contact

1. the event management team on Slack
2. or your Team Supervisor on Slack or
3. The Executive Producer on Slack

and see if they can open additional shows for that day.Â This will need to be approved, but most of the times it is possible.
