

What is the difference between the Roster Server and the Punch clock?

It is important to understand that the two systems the [Roster Server](#) and the [Punch Clock](#) work together to ensure the most proficient way of handling the vast number of events, productions, and staff rosters.

Â

The [Roster Server](#) is your Calendar notifications of all your of Scheduled

1. Work Job Rosters,
2. Event Rosters
3. Call Sheets (Call times)
4. Shift Changes and
5. Where you add your unavailability.

Â

The [Punch Clock](#) proprietary program is a

1. very advanced digital Production and Event Job Sheet.Â
2. The [Punch Clock](#) actually replaces the paper sheet of the old Event Management Job Sheet.

You must first activate and setup your staff profile on the Roster System before you can use the **Punch Clock**.Â Ciick here to learn [how to login and setup your Roster Staff Profile](#).
